- English (Fluent)
- Spanish (Basic)
- French (Basic)

PROFILE

Graduated in Computer and Automatic Engineering from Sapienza University of Rome. Passionate about technology and innovation, with hands-on experience in web development and artificial intelligence and personal practice with cybersecurity. My thesis project involved developing a binary change detection AI for satellite images, showcasing expertise in programming and data analysis.

Seeking to contribute to challenging projects in dynamic and growth-oriented environments. Graduated in Computer and Automatic Engineering from Sapienza University of Rome, with a strong passion for technology, innovation, and cybersecurity. I have hands-on experience in web development and artificial intelligence, including a thesis project focused on developing a binary change detection AI for satellite imagery—demonstrating solid skills in programming and data analysis.

Alongside my academic path, I developed a deep interest in cybersecurity, which I pursued independently through online courses, self-study, and practical labs. This has allowed me to build a solid foundation in areas such as network security, cryptography, vulnerability assessment, and penetration testing.

I am eager to apply and expand these skills by contributing to challenging cybersecurity projects in dynamic and forward-thinking environments, where growth, innovation, and security are top priorities.

WORK EXPERIENCE

Web Designer   2020-2023
Smarted Srl

- Designed and managed websites for various European projects: RestART, GAMEland, I'm In Tales, Nefele, Positive Academy and many others.
- Worked on both the structural and graphical aspects of web development.
- Specialized in creating websites using WordPress, with a focus on block-based design through Elementor, ensuring visually appealing and user-friendly interfaces.
- Created the official website for Smarted Srl, integrating modern and responsive design techniques.
- Learned to meet strict deadlines and collaborate effectively within an international team environment.

Dog Sitter   2017-2018
DogBudddy

- Provided care for pets, ensuring their well-being and comfort.
- Developed strong interpersonal and organizational skills through interaction with pet owners and coordination of schedules.

EDUCATION

Bachelor's Degree in Computer and Automatic Engineering   2024

Sapienza University of Rome

- Gained proficiency in programming languages: Python, C, C++, Java, JavaScript, HTML, CSS, PHP, SQL.
- Developed expertise in database management and web development.
- Thesis project: Binary Change Detection AI for Satellite Images (OSCD dataset).

High School Diploma

Liceo Scientifico Statale C. Cavour, Rome

- Specialized in IT and technology during senior years.
- Studied English in Cambridge during the summer of my second year.
- Final project about Artificial Intelligence.
